Can you help Monty Mouse find the cheese?

Write him a list of directions to follow to get through the maze. He only understands two types of directions: Go forward 5 steps and Turn (right or left). So, you can give him directions like:

Move forward 2 steps

Turn left

Move forward 4 steps

Turn right

Right now, he is about to enter the maze. I'll give you the first line:

Move forward 1 step

Now you write the rest of the directions.
